5/24/2024	Website	<p>Being a frequent (multiple times a week) user of the existing Bay Bridge spans, and a new but enthusiastic cyclist, I can't help but notice an opportunity to connect a great swath of the state to accessible bike, running, and walking trails, as well as multiple state and county facilities that offer access to the Bay. With the extension of the Broadneck trail on the west, and the Kent island trails in the east, connecting them through a dedicated pedestrian/cycling path on the bridge, locals and visitors on both sides of the bridge would be able to connect in new and exciting ways to the area's natural resources. It is an amazing opportunity that shouldn't be overlooked out of expediency, and has the potential to become a gem of outdoor recreation in the region.</p>
5/26/2024	Email	<p>Please consider having ferry service (like it used to be many years ago) at different points on the Eastern Shore to help divide up some of the load of traffic that comes to Kent Island. The new third bridge will only bring more traffic.</p> <p>Also, please consider a train service that has tracks that cantilever out from the existing bay bridge crossing the bay bridge and going all the way to Ocean City. It could relieve a lot of traffic from Kent Island to Ocean City, and OC can have a good bus service to get the visits all around the area.</p> <p>Thanks for the consideration, [Name Redacted]</p>
