3/25/2025	Email	<p>Dear Secretary Wiedefeld, Director Gartner and MDOT partners;</p> <p>We continue to be proud and grateful for the strong collaboration and shared commitment to safe active transportation and protection of vulnerable road users that the coalition of bike advocates shares with MDOT and the modal agencies. We were especially pleased to see consideration for a separated bike/ped facility in each of the five options recently presented in the Chesapeake Crossing Study.</p> <p>We want to give you a heads-up that we have launched a campaign to broaden public support for this iconic bike/ped facility. This will include a wide range of mission-aligned groups that include walking, running, biking, wildlife observation, environmental protection, tourism, multimodal transportation, etc. Our objective is to assure that the bike/ped facility becomes a required element of the design and construction of the new crossing.</p> <p>You should expect to receive the letter some time in April. If you have any questions or concerns, please let us know.</p> <p>Thank you for your continuing support for safe active transportation!</p> <p>[Name Redacted][Title Redacted] Bicycle Advocates for Annapolis & Anne Arundel County (BikeAAA)</p> <p>[Name Redacted] [Title Redacted], Bike Maryland</p>
